

SortSite

one-click site testing

SortSite 3.0

One click site testing, compliance, and search engine optimization

SortSite is a standards-based testing tool that makes it quick and easy to check web sites for multiple issues including accessibility, usability, browser compatibility and search engine optimization (SEO).

SortSite automates these checks and reduces web site testing to three simple actions:

1. Type in the URL you want to test
2. Click 'Check'
3. Review the test results on the dashboard

Overall Quality		27 pages with quality issues		better than average
Errors		16 pages with broken links or other errors		worse than average
Compliance		2 pages with compliance or legal issues		better than average
Standards		14 pages have W3C standards issues		better than average
Compatibility		0 pages with browser specific issues		better than average
Accessibility		26 pages with accessibility problems		worse than average
Usability		25 pages with usability issues		worse than average
Search		14 pages with search engine issues		better than average

From the dashboard you can drill down and see detailed problem descriptions and suggested resolutions.

Benefits

- **Test entire sites**
The built-in web crawler follows every link, applying over 400 quality checkpoints to each page.
- **Reduce consultancy costs**
SortSite reduces the amount spent on third parties by enabling accessibility, usability and search engine optimization to be done in-house.
- **Get more visitors**
SortSite applies search engine guidelines and SEO best-practice rules to ensure your pages perform optimally.
- **Retain more visitors**
Broken links, server error messages and usability problems drive visitors away. Find and fix these problems first.

Checkpoints

- **Accessibility** - check sites comply with W3C WCAG1, WCAG2 and Section 508 standards
- **Broken Links** - check for broken links and badly configured servers
- **Compatibility** - check for browser specific code, script and image formats
- **Compliance** - check for compliance with EU and US law
- **Search** - check Google, Yahoo and Bing content guidelines
- **Standards** - validate HTML, XHTML and CSS
- **Usability** - check against Usability.gov guidelines
