System requirements:	Windows 7, Vista or XP 512 MB RAM 20 MB free disk space
Technical support:	Email and phone support is free of charge for 30 days after purchase. Optional 12/24 month support and maintenance contracts are available.

SortSite

SortSite is a standards-based testing tool that makes it quick and easy to check web sites for issues including accessibility, usability, browser compatibility and search engine optimization (SEO) issues.

A web site is crucial to the perception of a business or organization, so web site problems create a negative impression in the minds of site visitors. Eliminating problems improves the web site user experience, and helps sell the organization, its products and services.

Web site owners often engage third-party consultants for search engine optimization and accessibility testing. SortSite enables organizations to do this in-house for less a day's consultancy fees.

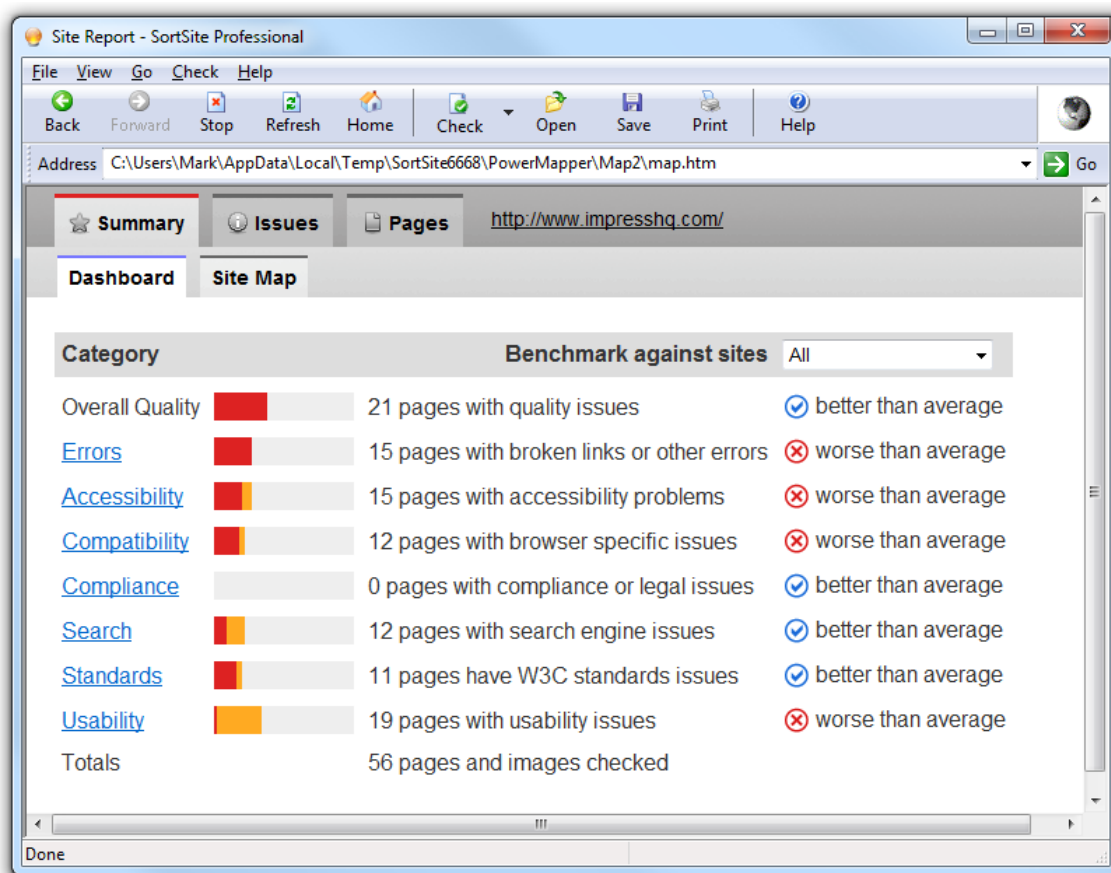

SortSite

one-click site testing

SortSite automates these checks and reduces web testing to three simple actions:

1. Type in the URL you want to test
2. Click 'Check'
3. Review the test results on the dashboard

It is as simple as that. With one click, SortSite spiders your entire site seeking out and identifying errors by testing each page against 450 checkpoints.

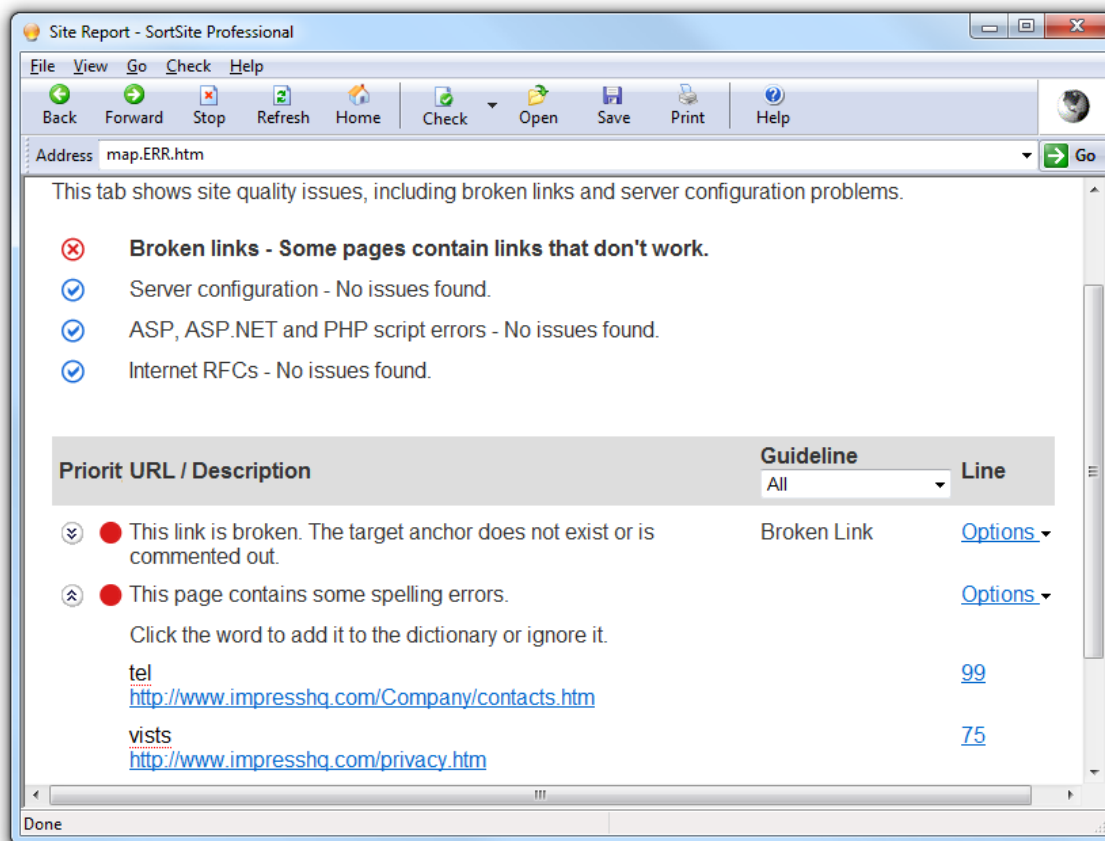

The comprehensive report produced includes an easy to use dashboard. Issues appear under seven key headings with the problem location displayed alongside every link. This allows for clear analysis and directs the user to the problem, making it easier to deal with.

SortSite

one-click site testing

Unlike web-based tools, SortSite checks sites behind firewalls or still in development, making it an invaluable tool for web developers. Reporting is easier because all issues appear on a single dashboard that allows benchmarking results against specific industry sectors such as Technology, Professional Services, Government, and Financial Services.

SortSite is available in two editions:

- Standard Edition aimed at web developers
- Professional Edition aimed at enterprises and consultancies

Feature	Benefit	Supported Standards	Std	Pro
Dashboard	Tracks issues over time and compares your site against industry sector benchmarks.		•	•

SortSite

one-click site testing
